To whom this may concern,

In your reviewing my documents for your summer internship program, it is my hope that you will find the competitive edge needed for my admissions to your stellar program. My student status is that of junior majoring in Computer Science and minoring in Math.

My experience in technology and customer relationship management, combined with my courses in computer science have convinced me that working with your government agency will prepare me for marketing my STEM skills and career options to be explored in the near future.

More importantly, an internship with your company would be mutually beneficial. In researching your organization, I have learned that exercising my experience from Fayetteville State University integrated with your summer internship will prepare me for excellence. Additionally, my experience in computer languages include:

- Python (Basic & Advance)
- Maple
- Mathematica
- CISCO

I am sure that it would be worthwhile for me to experience your program. If I am selected, I will be looking forward to meeting you and anxiously await experiencing summer internship. I do look forward to further communications referencing this student opportunity.

Thank you for any consideration with this matter.

Sincerely,

Lee Gibson
